# Introducing Amber Connect.

Secure your investment with the world's most sophisticated AI - powered vehicle security and fleet management telematics solution.

Serving over 30 countries and counting, our mission is to provide safety, security and peace of mind to vehicle owners; deliver robust business intelligence for commercial verticals and create a safer and a more secure society by offering affordable IoT security.

Manage your vehicles from your smartphone using our mobile app which boasts over **40 powerful & engaging features.**

## Amber Shield

Our game-changing Amber Shield feature uses artificial intelligence to protect your fleet. When a threat is detected, the vehicle shuts down the engine, sounds an in-app alarm and places a call to alert you.

## Fleet Tracking

Discover the true potential of your fleet with our feature-rich and user-friendly Smart Fleet Management GPS System. Track your vehicles in real time, investigate historical location data, reduce fuel costs, and plan optimal routes - all from one platform.

## End-to-End Insurance Telematics Software

We're able to generate actionable insights and superior data intelligence for insurance companies, enabling them to make better business decisions via our driver scoring system that allows insurance companies to charge pay as you drive or offer discounts to be used based on driver scoring.

## Fleet Risk Telematics

A unique platform that allows a fleet manager to keep an overview of the risk of the entire fleet through a dedicated scoring module for the vehicles and drivers with risk alerts.

**Connect.  
Detect.  
Protect.**

# **04** Amber Vision

Dashcams

# Amber Vision

The Amber Vision product range that allows for video intelligence alerts based on driver behaviour as well as road safety. Products allow you to monitor inside the cabin of the vehicle, and out.

# **06** Amber Covert

Wired Tracking Devices

# Amber Covert

Amber Covert is our line of our discrete, yet powerful vehicle tracking devices that gives you full control of your vehicle. Using AI technology, these tracking devices give you notifications for driver behaviour, vehicle speed, fuel spend and every time your engine is on, every single turn taken on the road, and much more.
